Download Of LeagueLoch.

Please use and freely distribute it !!!!

LeagueLoch, is a basic database, allowing you to add documents with supporting record comments !!!!
Exporting them as HTML files !!!!

LeagueLoch, was created by the author to help him organise his own legal paperwork.

He had basically given up on the legal system and all of its legal representatives and for them to do the right thing.

The legal system has never seemed at all interested in his wealth fare or of his well being, but only for their own self interests of wealth and not of justice !!!!

If a solicitor needs a licensed copy, please email me:

register@leagueloch.com

or

Please also note, that all of the Html documents and their associated record summaries files, were created by LeagueLoch.

A full registered version of LeagueLoch, will give your solicitor unlimited installations.

How To install LeagueLoch.

You can install the Free version of LeagueLoch in several ways.
Please note that this version is for personal use only.
No cooperation is to use or distribute its executable without the authorisation of the author !!!!
You can freely distribute your own legal material with the use of LeagueLochs created Html linking files by using the supplied copy facility option found on the top of the disclaimer screen.
This will copy all the relevant files that's required for you to access all of your linked files that are mapped to the 'R' drive.
As stated above, you can install this Free Version of LeagueLoch onto any directory whether its on your own physical hard drive or a shared home/network drive !!!!

Below is the method on how to install Leagueloch onto a USB stick.
You can use the the same principles for installing it onto your hard drive !!!!
Just copy the FreeVersion.exe file to your newly created directory and then run it !!!!

1, Format a spare USB stick.

2, Copy the FreeVersion.zip, which is located in the LeagueLoch directory of the supplied USB stick and then unzip this file to the newly formatted USB stick.

3, You will need to run the freeversion.exe file first, and this will install LeagueLoch on to your newly formatted USB stick.

Lastly, Once all of the files are installed onto the new USB stick, you will need to run the RunMe_First.exe file, this will automatically map your USB stick as drive "R", and give you a menu to run LeagueLoch !!!!

The authority code:- L34gU3L0cH

Please see, our YouTube Channel for the installation video !!!!
